AccKall[™]

Active Control Software for Mobile, Long Distance,
International Long Distance and Other Calls V.3.2

Description:

This tool will help you control phone calls to mobile phones, long distance, international long distance, or any predetermined prefix made from your company's IP extensions, helping you reduce costs and increase efficiency.

Main Characteristics:

- With AccKall you will be able to give and distribute calling time among previously determined groups and their members.
- Use AccKall to list, edit, enter and delete those extensions you wish to monitor.
- Aside from the group descriptions, you will also find the total call time provided, the maximum time limit for partial calls, the total remaining time for making calls, the extension number and assigned user.
- Additionally, the integrated search engine will prove extremely helpful at the moment of controlling and assigning call time.

Web Interface:

The screenshot displays the adportas AccKall web interface. At the top, there is a navigation bar with buttons for Report, Extension, Control, Users, Groups, Timer, and Exit. The main content area features a table of user registrations and a sidebar on the left for filtering and searching.
